

What Size "Can" Do You Use?

At Deluce Recessed Lighting, we pride ourselves on our quality cans. Whether your needs are small to large, Deluce Lighting has the solution!

3" Can

The 3" range is the best type of accent lighting Deluce has to offer. Being that the 3" range is the smallest aperture housing we sell, it lights a sharper beam of illumination to highlight colors and tones. This range varies in different styles of trims from standard and sleek color finishes to decorative glass and lens options. This range is ideal for interior bars, jewelry stores, trophy displays, galleries and etc.

4" Can

The 4" line is a very versatile range in regards to accent, task, and general lighting. It offers multiple recessed down light options in regards to line and low voltage applications including Incandescent, Halogen and LED lights. Our vast and attractive line of trims for this range come in baffles, gimbals, eyeballs, and other decorative options; which are just a taste of our offering. Ideal applications for this range are residential homes, lobbies, restaurant/lounges and etc.

5" Can

The 5" line is the "designer's choice" styled range. Although 5" is not as popular as 6", this line gives most end users and designers exclusivity and originality. Standard, lens and decorative glass trim options are intertwined with this range. Ideal applications for this range are high-end homes, offices, schools, museums and etc.

6" Can

The 6" line is our most popular range of down lights sold today. Our offering of 6" Residential, Commercial, or Industrial down lights cover Incandescent, Halogen, Metal Halide, LED and Compact Fluorescent technologies. We offer multiple trim options for high output reflectors, directional task lights, sloped/super sloped ceilings, and even various wet location rated styles. This range is ideal for applications such as residential homes, restaurants/lounges, schools, offices and etc.

8" Can

The 8" line is the "commercial choice" styled range. This is the most popular size of recessed lights we sell for most Commercial and Industrial applications. This range covers Incandescent, Metal Halide, LED, and Compact Fluorescent lights. Ideal applications for this range benefit in schools, airports, offices, hotels and etc.

10" Can

The 10" line is the largest aperture-sized range Deluce has to offer. This line predominantly covers Incandescent, Metal Halide and Compact Fluorescent technologies. Ideal applications for this range benefits in schools, gymnasiums, hotels, museums, airports or any large area spaces with high ceilings.
