## SPECIFICATION & FEATURES

Catalog Number
Notes
Job/Title

### APPLICATIONS:

The Micro Strip (MIC) Series is ideal for residential, industrial, commercial and retail applications. This fixture is also an excellent source of lighting for size restrictive areas. The Micro Strip uses high efficiency T5 lamps or T5HO lamps for higher lumen output (lamps not included).

### CONSTRUCTION:

The Micro Strip is formed from 24 gauge steel, allowing for exceptional strength and durability. The body is constructed with numerous KOs for ease of installation. Twist lock style lamp holders included.

### FINISH:

The powder coating is performed at post fabrication. It is applied electrostatically then heated to cure. This finish provides for better protection of the steel and also provides for better protection from very sharp and open edges. Parts are finished in a white high reflectance lighting grade baked enamel.

### ELECTRICAL:

\*\*\*CONSULT FACTORY FOR BALLAST INFORMATION\*\*\*

### LISTING & RATINGS:

UL: suitable for damp locations.

### WARRANTY:

Guaranteed one year from the purchase date of the product, against mechanical defects in manufacturing.
